

```
| if you index into "UNpop", but not if you use the dollar  
| sign.  
...  
|=====| 92%  
| R uses a special character to denote comments. Use the  
| "print()" function to write 'X starts every comment'.  
| Replace X with the appropriate character.  
> print("# starts every comment")  
[1] "# starts every comment"  
| Nice work!  
|=====| 96%  
| What would you type to load the R package "utils"?  
> library(utils)  
| Excellent job!  
|=====| 100%  
| You've successfully completed part 2 of the Intro  
| course!
